

The following is a pricing guideline for the basic replacement of hardwired smoke alarms mounted 12 feet high or less. (These prices are as of 11/2014, and are subject to change. Please call Mark Raugh Electric at 484-955-3006 to confirm prices and availability.)

Replacement of smoke detector with a Kidde i5000: \$35 per each detector
(i5000- Ionization type smoke alarm with 9 volt alkaline battery backup) The Kidde i5000 is a basic ionization type smoke detector with a 9 volt battery backup, and is the model that I typically install for most installations.

It is a good idea to have carbon monoxide detection on every floor, and it is also recommended by some that a combination of both ionization and photoelectric smoke detection be used in a home. The following is a sample of the many additional options available, some of which will help to accomplish the CO and photoelectric smoke detection if desired. Some of the models listed below also include a sealed 10 year battery backup, which eliminates the hassle of replacing batteries.

Replacement of smoke detector with a Kidde i12010S: \$54 per each detector
(i12010S- Ionization type smoke detector with a sealed 10 year battery backup) *This unit does not provide carbon monoxide detection.

Replacement of smoke detector with a Kidde KN-COSM-1BA: \$60 per each detector
(KN-COSM-1BA- Ionization type smoke detector/carbon monoxide detector with AA battery backup)

Replacement of smoke detector with a Kidde KN-COPE-I: \$83 per each detector
(Kidde KN-COPE-I- Photoelectric smoke detector/carbon monoxide detector with 9 volt battery backup)

Replacement of smoke detector with Kidde i12010SCO: \$82 per each detector
(i12010SCO- Ionization type smoke detector/carbon monoxide detector with a sealed 10-year battery backup)

You are also welcome to purchase your own detectors. The cost to replace customer supplied detectors would typically be \$20 per detector. It is recommended that you consult with me at 484-955-3006 prior to purchase to confirm proper detector selection.

Feel free to contact Mark Raugh Electric at 484-955-3006 with any questions or concerns. These detectors may be viewed online at www.kidde.com.
